

A visual language for **scalable** products

Шаблон применения дизайн-системы Radugadesign в
продуктовых интерфейсах. Один шрифт, одна hue, чёткая
сетка карточек.

Scalability Plan

by Stream

Year 1

Domestic Expansion

Grow market penetration and strengthen recurring revenue base.

Year 2

International Growth

Expand into Europe and Asia with localised enterprise contracts.

Year 3

Product Diversification

Launch additional features and revenue streams to maximise lifetime value.

Market Traction

Our traction proves strong product-market fit and accelerating enterprise adoption.

4k

Clients to date · 90% of main goal achieved

12

enterprise clients closed in 90 days

300%

YoY revenue growth — fastest in segment

Growth in Action

by facts

Pipeline velocity ×3

Deal cycles cut from 90 to 30 days through self-serve onboarding flows.

NPS 72 sustained

Two consecutive quarters above 70 — without paid retention programs.

Time-to-value 4 days

From signed contract to first production workflow deployed by client team.

96% gross margin

Pure-software economics — no infra reseller markup eating the spread.

Competitive Landscape

by Stream

	YOU	Competitor 1	Competitor 2	Competitor 3	Competitor 4
Real-time collaboration	●	●	○	●	○
Self-serve API	●	○	●	○	○
SOC 2 + ISO 27001	●	●	○	●	●
Native SSO + SCIM	●	○	●	○	○
Open data export	●	○	○	○	●

How it works

in 4 steps

1

DISCOVER

Map the existing system

We audit current workflows, surface bottlenecks, define measurable targets.

2

DESIGN

Codify the rules

Tokens, principles, anti-patterns. Same source of truth for humans and agents.

3

DEPLOY

Ship with the team

Roll out in production with live shadowing — no separate handoff phase.

4

ITERATE

Measure and adjust

Quarterly reviews against the targets. Bad rules get retired, good ones harden.

8.4x

faster cross-team handoff after
the design system rollout

Next step

Let's talk

Ready to ship in your aesthetic.
